

Think green. Please consider before printing this document.

Poles, 2 pcs

V-rails for attaching canvas, 2 pcs

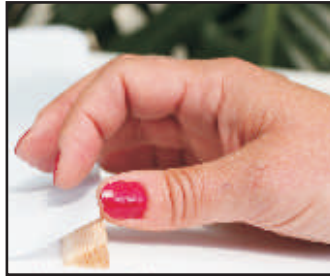

T-base (foot)

Upper rail

Lower rail with screw

The Pine display system is a long term sustainable marketing solution.

- Place the canvas face up.

- Put the V-rail on the backside sharp edge pointing towards the center of the print.

- Use a stapler to attach the canvas to the V-rail (5-8 staples)

Attach the T-base to the lower rail and tighten.

Slide on the upper rail.

Slide on the lower rail and T-base connection.

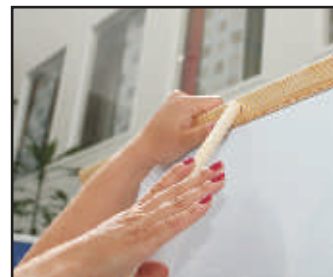

Connect the pole to the T-base in an angle. Twist the pole to ensure fit.

Connect the second pole to the first and twist the pole to ensure fit.

Hold your foot on the T-base while lifting the upper rail. Bend the pole towards the canvas. Using an open palm ensures that you do not use excessive force.

Let the upper rail "flip over" the end of the pole. No force needed.
